Multitek®

Multitek

We have been researching, designing, developing and manufacturing since 1989.
Multitek has become the leading intercom manufacturer in Turkey and surrounding regions, with deep commitment to R&D and new technology development.

Today, Multitek provides solutions all over the world with 160 employees, 14 regional offices and more than 500 business partners.

Starting with telephone exchanges; Multitek has added intercom systems, smart home management, fire alarm detectors and telecommunication systems to its portfolio in years. With in-house R&D, manufacturing, sales and after sales units; new product development is a never ending passion for the company. Multitek is the sole certified intercom manufacturer in Turkey, verified by ministry of industry and technology.

Multitek R&D is now focused on IP intercom systems, integrated smart home applications and tele-health solution. As one of the first companies to develop IP intercom system in 2016, Multitek has already implemented and completed thousands of IP solutions and smart home projects.

Multitek's smart manufacturing facilities are located in Istanbul on 7000m² closed area with high capacity SMT and assembly lines. By investing more in new equipment, technology and qualified resources; we aim to provide better solutions every day for a smarter world.

WHY IP INTERCOM ?

"Easy implementation and maintenance. No need for additional technical knowledge."

"Superior functionalities with internet / mobile technology infrastructure."

Video and voice quality are the same and crystal clear for all rooms. No picture noise or colour loss."

"All these functionalities with competitive prices."

"Ready for future developments."

Number of rooms in your building does not matter! 2 or 1000.. Just connect the network with CAT6 cabling. Easy to implement without training or a special program

All rooms can talk to each other at the same time without any limit.

All rooms and management can send messages to each other, management can broadcast messages.

Unanswered calls and their screenshots are saved and sent to mobile phone.

There is no need for additional infrastructure elements like video distributor, amplifier etc.
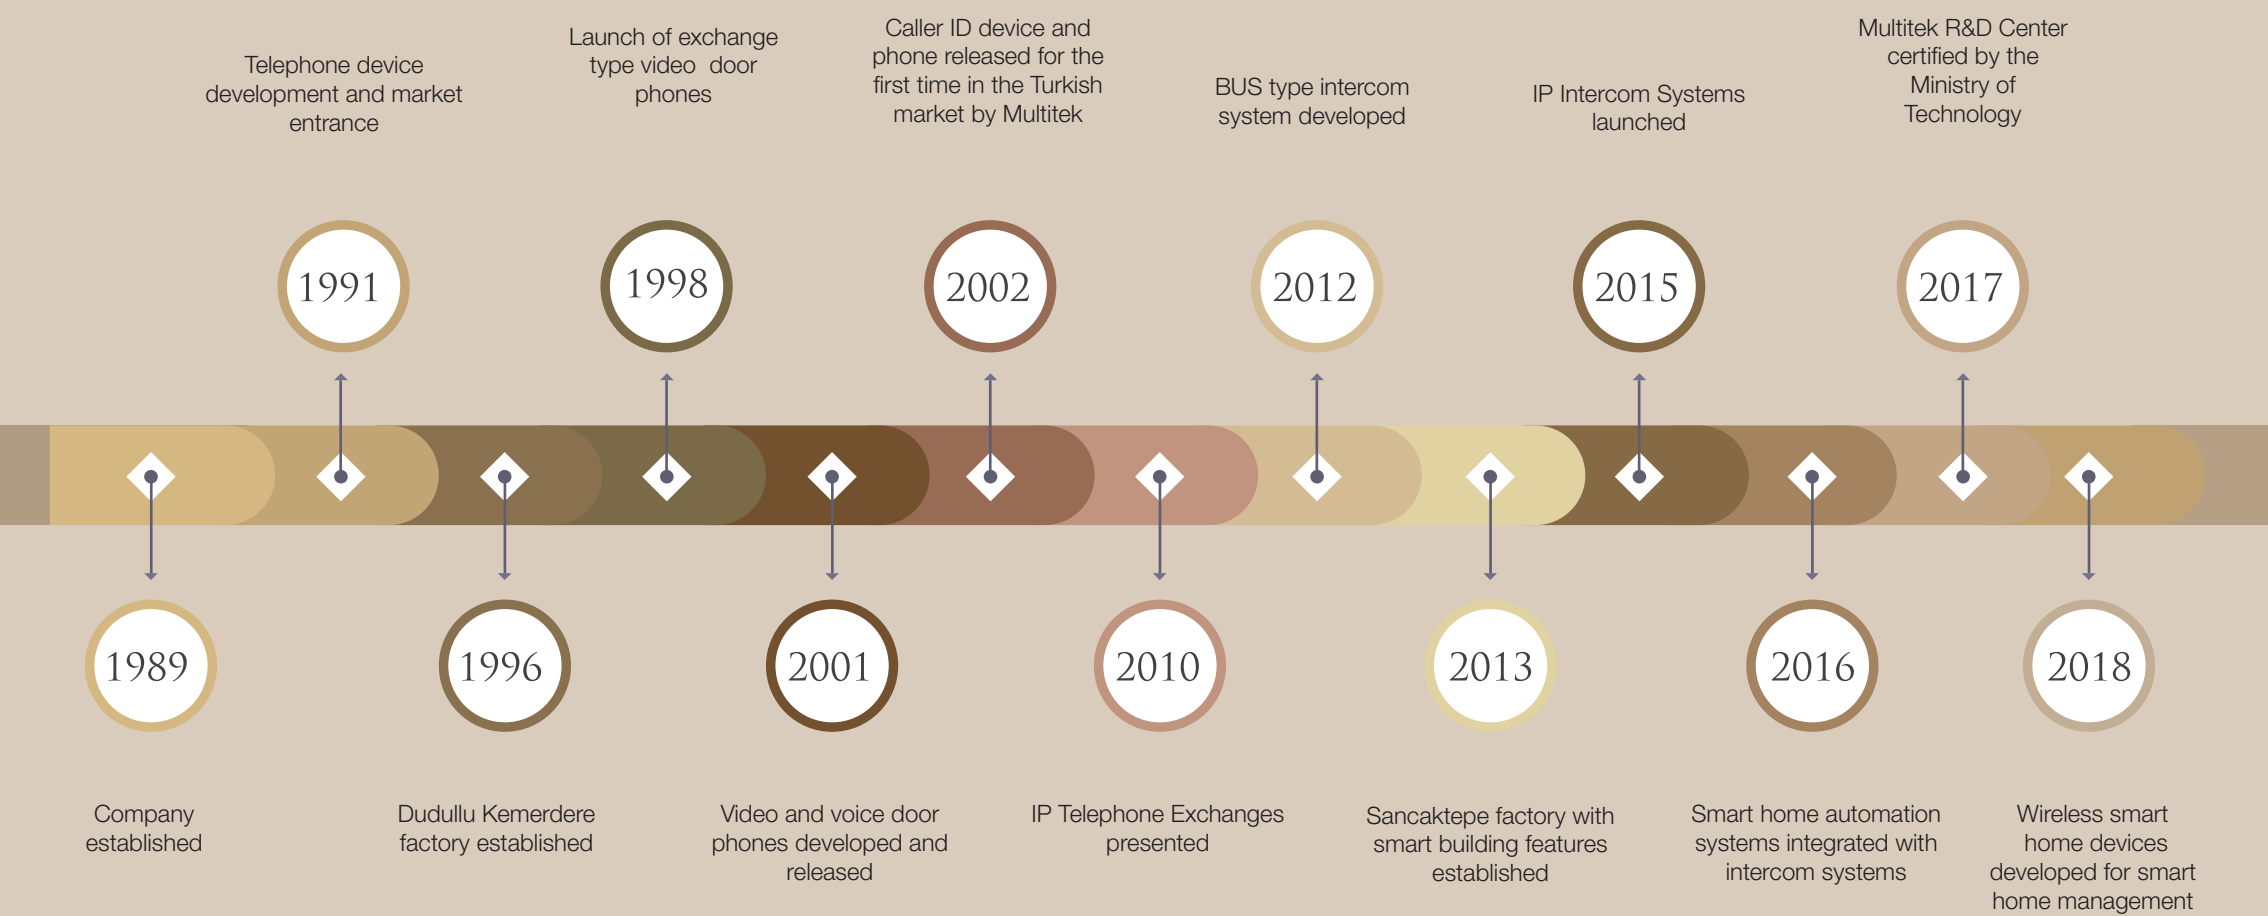

The closest or the most distant monitor has the same video / voice quality

Compared to other analog or IP intercom systems in the market, it is easier to implement, cable and maintain

IP is the future! IP intercom systems have great capability to meet future needs such as smart home, alarm and IoT.

OUR JOURNEY

Telephone device development and market entrance

Launch of exchange type video door phones

Caller ID device and phone released for the first time in the Turkish market by Multitek

BUS type intercom system developed

IP Intercom Systems launched

Multitek R&D Center certified by the Ministry of Technology

GUV-IP100

IP intercom system is created with 4 devices and cabling:

Device Types:
1. Room monitor
2. Door panel
3. PoE Switch
4. Adaptor

All these devices are connected to each other with CAT6 cable. Additional power cable is not required, all network retrieves power from PoE switch.

There is no limit in number of connected room monitors or door panels, system can be extended with additional PoE switches and adaptors.

ADDITIONAL TRAINING IS NOT REQUIRED TO IMPLEMENT MULTITEK IP INTERCOM SYSTEM. YOU DO NOT NEED TO KNOW IP ALLOCATION OR NETWORK, IT IS AS EASY AS COUNTING NUMBERS.

Integrate PoE switches and adaptors to room monitors and door panels in the block.

CAT6 cabling is used if distance between blocks is less than 70 meters.

If distance between blocks is more than 70 meters, fiber infrastructure is used.

Security console with 10" screen is added to security points

IP cameras located in security points, surrounding CCTV cameras are connected to intercom network.

1-Anroid IP Intercom and Smart Home

control your
intercom,
alarm and **smart home**
features with a single device

Smart Home Management

Increase your security and comfort at home by selecting the most suitable smart home solution for your home. Wireless RF, KNX, Somfy RTS and relay..

KNX somfy Kablosuz 433 MHz 150 m

Alarm Management

Increase your home's security level by adding new alarm detectors. You can control alarms via your mobile phone and direct them to building management.

Intercom Features

Advanced intercom features (video call and message between rooms, snapshot of the visitor etc.) Never miss a visitor again!

IP Intercom System Features

» Capacitive touch screen with high sensitivity and resolution (TFT LCD 1024x600 pixel)

» All features can be controlled from mobile device

» No need for additional infrastructure elements (i.e. server) to build a network

» Perfect video and voice quality regardless of number of floors

» Network connection with CAT6 cabling

» Video and voice call between rooms

» Connection to security, gatekeeper, site manager and other rooms with a single tap

» No limit in number of additional IP cameras

» Different ring tones for different callers (i.e. security, room)

» Multiple messages sent to all rooms easily

» Screenshot of unanswered calls sent to mobile device

» Smart home enabled with different devices and protocols

EK ÖZELLİKLER

Talking with handset

Calling/called numbers registration

CCTV camera connection

Message broadcasting

Proximity card management (optional)

Multitek®

INTERCOM FEATURES

• 7" / 10" TFT LCD, capacitive touch screen, 0.3 Mpixel camera, TFT card, room door button connection, date and clock information on screen
• Energy from PoE connection
• No limit in number of concurrent video / voice calls between rooms
• Different ring tones for different calls
• Snapshot of missed calls (1000 pictures)
• 4 parallel devices can be connected in a single room
• No limit in number of connected IP (ONVIF) cameras
• Send and receive short messages and files
• Emergency call, do not disturb, follow me etc. additional features
• Low energy consumption

ALARM MANAGEMENT

Intercom features are built-in with additional alarm featıres
• Wired and wireless 8 alarm zones (8 zone)
• Arm / disarm alarm zones by remote control or via IP monitor
• Heat, natural gas, smoke, magnetic, PIR (motion), water leakage, glass broken detectors can be connected
• Siren connection (optional) and programming siren horn time duration
• Alarm information is sent to security console and defined mobile number
• Special contact connection for alarm information transformation
• Detailed alarm information reports
• Setup for all alarm related variables

SMART HOME MANAGEMENT

Intercom and alarm features are built-in with additional smartt home features
• No need for additional controller gateway
• Smart home can be designed according to needs and capabilities: KNX, RF modules, wireless Somfy RTS modules or relay control
• Control your home with RF modules from mobile app or IP monitor: ON/OFF ports, light switch, dimmer, shades, etc.
•Control your home with relay (RL): ON/OFF control, shades etc.
•Control your home with KNX devices: Any KNX device can be connected and controlled via monitor and mobile app.
•Control your home with Somfy wireless RTS: Meet our special product designed and developed with Somfy. Specially designed VIP70 Somfy monitor can control Somfy RTS wireless modules.
• Create your own control scenarios and select favorite products for customized comfort
•Task activation time and task devices can be set
•Alarm and smart home devices can trigger each other (i.e. turn off water when water leakage alarm zone is on)

MOBILE APPLICATION

• All smart home and alarm detectors are controled by the smart phone application dowloaded from App Store or Google Play Stores.The apps are free.
• Alarm can be armed / disarmed, notification sent during alarm presence
• Easy connection setup via QR code designated in room monitor's settings
•Snapshot of missed calls sent to application with a notification
• Calls can be established between the door panel and the mobil phones. Two-way video communication between mobile device and door panel for intercom calls and to unlock doors.

Multitek®

1. SMART HOME MANAGEMENT WITH KNX DEVICES

Why should use KNX smart home system?

A world-class smart home system that offers more convenience, security, and more energy saving!
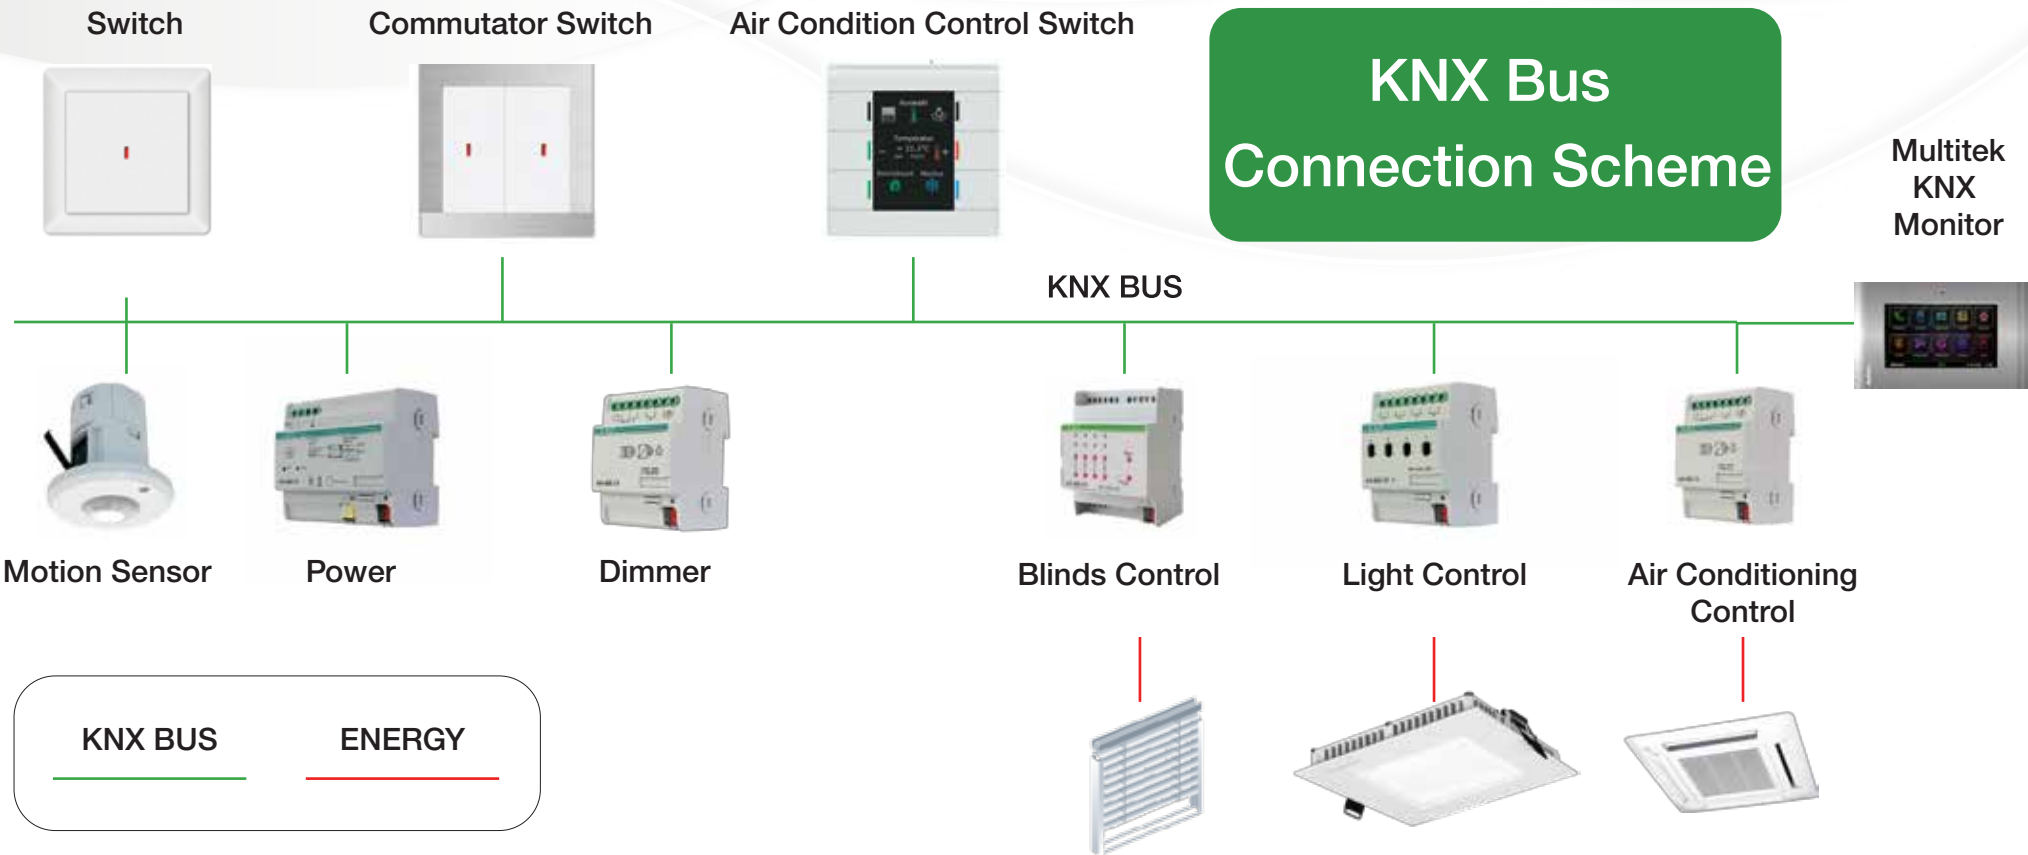

1. KNX is a home automation and smart home system protocol defined by Europe's most reliable EN 50090 standard.
2. KNX is the smart home and building automation system built by more than 240 leading companies in the world.
3. 80% of smart home systems installed in the world are KNX systems.
4. KNX is the standard of certified products, which are easy to use, easy to wire, with high security, centrally controllable, and where you can ask for assist when you have a problem.
5. It is a system that can be integrated with different building management systems by its modern, future oriented structure.
6. It is a system that has an independent substructure from manufacturer, which can supply products from different manufacturers.
7. Provides a single substructure and maximum flexibility for multiple functions.
8. it is a reliable standard, developed for energy saving.

SMART HOME-RF WIRELESS AUTOMATION MODULES
433 MHz, 150 meters range in open area (30 meters in closed area)

|	
	RF- 4ONOFF (4 PORTS ON/OFF WIRELESS CONTROL MODULE) Used for turning ON/OFF four selected devices (i.e. electricity, gaz, water, heater). It is also possible to turn ON/OFF devices manually with buttons on the module. The module pears the wireless code automatically. It may be mounted to DIN rail electricity panel of the room.
	TO1 (WIRELESS TEMPERATURE CONTROL MODULE) (JAN 2019) It is connected to heater to control the room temperature. It works with a battery.
	DO1 (WIRELESS CONTROL LIGHT SOCKET-DIMMER) It is used to control LED lamps up to 60 watt with self learning wireless code.
	IO1 (MINI FLUSH MOUNT REMOTE CONTROL RECEIVER) Installed behind ON/OFF wall switch of the light. The wall switch can also control the module manually. It powers up to 2000W. (Phase and neutral cables are needed.)
	IO2 (MINI FLUSH MOUNT REMOTE CONTROL RECEIVER) Installed behind ON/OFF wall switch of the light. The wall switch can also control the module manually. It powers up to 150W LED, halogen, fluorescent lamps. (Neutral cable is not needed.)
	DO2 (MINI FLUSH MOUNT REMOTE CONTROL RECEIVER-DIMMER) Installed behind ON/OFF dimmer wall switch of the light. The wall switch can also control the module manually. It powers up to 150W.
	PO1 (ROLLING SHUTTER CONTROL) Installed behind blind/ curtain/rolling shutter wall switch. The wall switch can also control the module manually. It powers up to 500W.
	KO1 (REMOTE CONTROLER) It controls up to 12 wireless channel where each channels controls 5 wireless codes. It has also group ON/OFF function.

3. SMART HOME MANAGEMENT WITH WIRELESS RTS SOMFY MODULES

Somfy and Multitek have created a brand new technology -VIP70 Somfy- using Somfy RTS and Multitek IP Intercom to create smart wireless world for everyone! Now it is time to plug and play!

Radio Technology **somfy** inside

is currently one of the most reliable wireless home otomation system of the world.

• Multitek provides intercom products including; VIP70-SOMFY monitor, door panels, energy sources.

• VIP70 - SOMFY Room monitor has built-in intercom features and alarm management capabilities, behind SOMFY RTS wireless.

• Somfy provides a huge range of wireless smart home devices including micro receivers, smart sockets, motor control receivers, thermostat and remote controllers.

• Each VIP70-Somfy monitor can control 5 product groups. Each group can be designed by the user regardless of product type.

• Adding and deleting Somfy RTS devices to monitors takes only a few seconds!

• VIP70-Somfy works without any additional gateways, however if Somfy Connexoon is added to the system, all devic- es can be controlled individually via mobile application

VIP70-SOMFY room monitor features

It has the all functions of VIP70 monitor including the intercom and alarm features. Additionaly, 5 group of Somfy RTS wireless smart home modules may be registed to monitor to control the Somfy RTS devices by touching the icons on the monitor.

If **"CONNEXOON – Smartphone control device"** is connected to IP intercom network all wireless devices can be controlled individually via mobile application.

It is possible to pair the following wireless RTS modules to VIP70-SOMFY monitor:

Electricity, gas, water control module

• Mini flush mount light control module

• Wireless controled socket or dimmer socket

• Blind/Curtain/Rollershutter control module

• Heater control and room thermostat

Technical Features

Screen	**: 7" TFT LCD (1024X600 pixel)**
Camera	**: 0.3 Mpixel CMOS**
Network	**: Ethernet (PoE) CAT6 cable**
Operating System	**: Android**
Dimensions	**: 217x144x29 mm (wall mount)**
Colour	**: White**

RTS Product Features

Frequency	**: 433.42 MHz**
Radio Range	**: 200 m (Open Area),**
	30 m (Closed Area)
Operating Voltage	**: 220VAC**

SMART HOME - SOMFY RTS WIRELESS DEVICES

	CONNEXOON RTS	**CONNEXOON RTS** Connected RTS devices can be controlled individually by mobile application
	LIGHT CONTROL	**INDOOR MICRO LIGHTING RECEIVER RTS** Installed behind ON/OFF wall switch. Used for halogen light (500W), LED light (600W) or valves ON/OF (500W). Records 12 transmitters.Neutral cable is needed.
	SOCKET CONTROL	**REMOTE CONTROLLED ON/OFF INDOOR SOCKET RTS** Any electrical device can be controlled. (3600W)
	SOCKET CONTROL DIMMER	**REMOTE CONTROLLED ON/OFF INDOOR DIMMING SOCKET RTS** Plug with dimming functionality. Any light can be remotely dimmed. (3500W)
	MOTOR CONTROL	**MICRO RECEIVER FOR BLINDS RTS** It is mounted behind blind switches on the wall to control the motorized blind/curtain wirelessly.It works with any standart wall switches. Dimensions:41x45x19 mm
	REMOTE CONTROL WALL TYPE	**SMOOVE ORIGIN RTS, WALL TYPE REMOTE CONTROL** Single channel, touch button, wall type remote control. Has 3 years battery life.Battery3V. Dim.: 50x50x10 mm Col.: Shinny White
	REMOTE CONTROL	**TELIS 1** Single channel, hand type remote control. Up, down, stop, my buttons. Save favourite position to "my"
	REMOTE CONTROL	**TELIS 4** 4 +1 channel hand type remote control. . Up, down, stop, my buttons. Save favourite position to "my"
	REMOTE CONTROL	**TELIS 16** 16 channel remote controller with digital screen. Picture and name allocation to channels is available. Up, down, stop, my buttons. Save favourite position to "my"
	THERMOSTAT	**THERMOSTAT** Wired (or wireless) connection to the heater. It controls the room temperature and saves energy.Work independently from IP system. It needs battery and has an app to control from mobile phone

4. SMART HOME MANAGEMENT WITH BUILT-INSIDE RELAYS

Devices are controlled by built-in relays inserted in room monitors. Relay number can differ according to the type of the monitor.

VIP100 / VIP70-SMART-RL   4 relay control
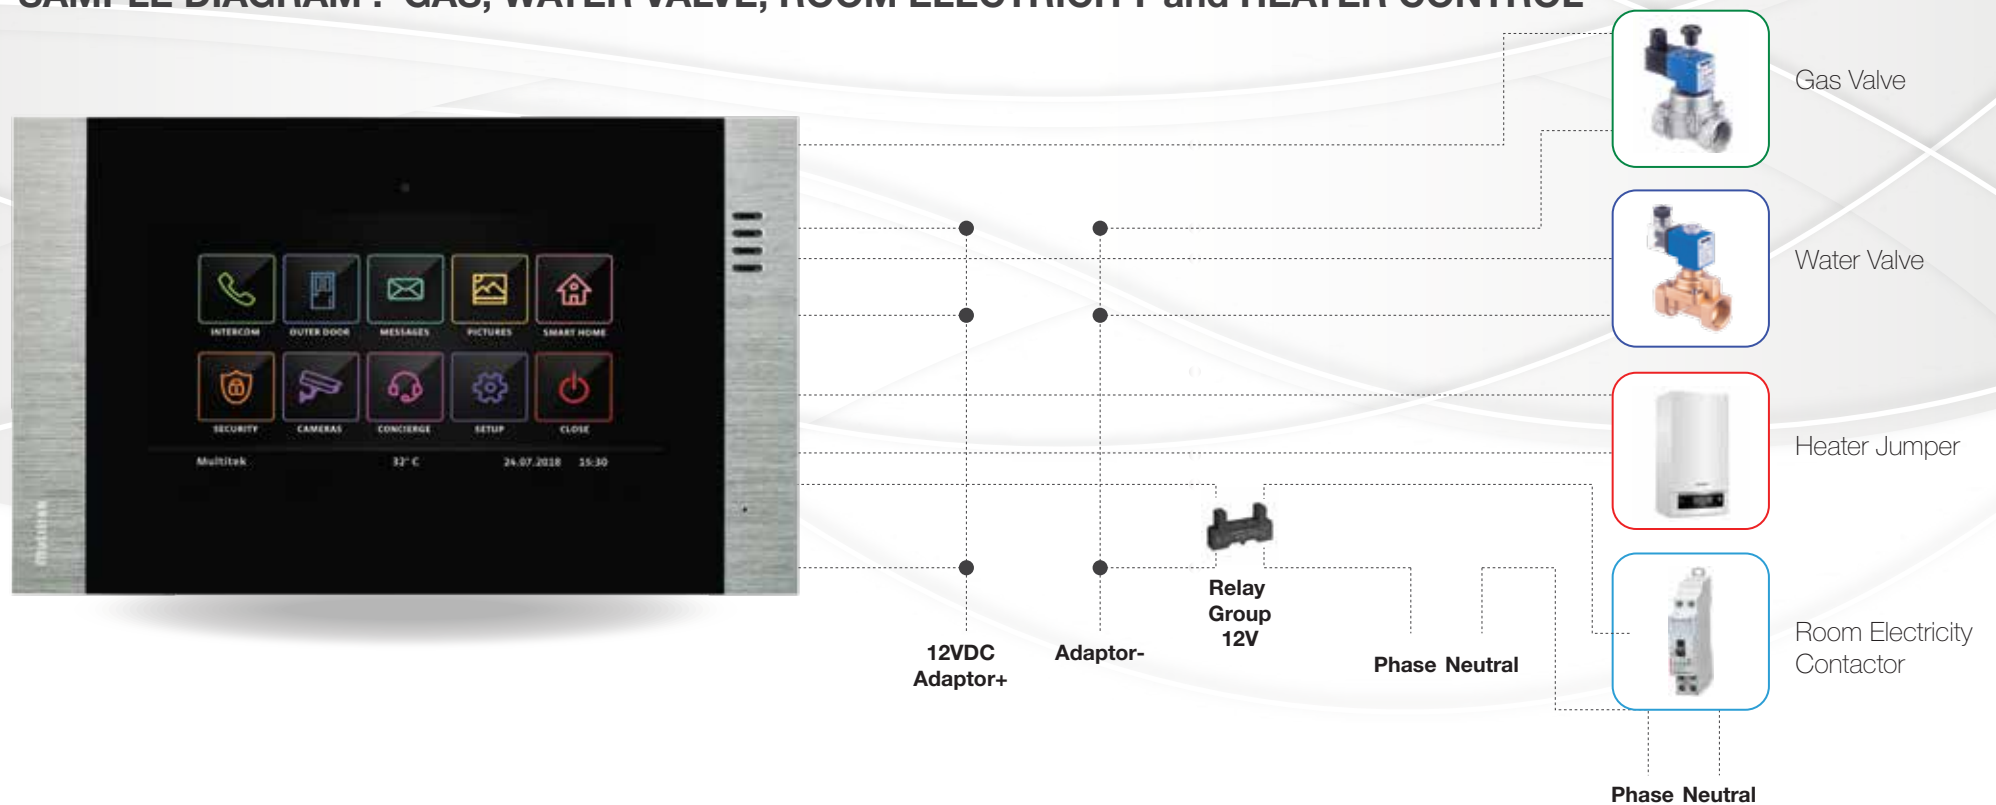

VIP72-SMART-RL   8 relay control
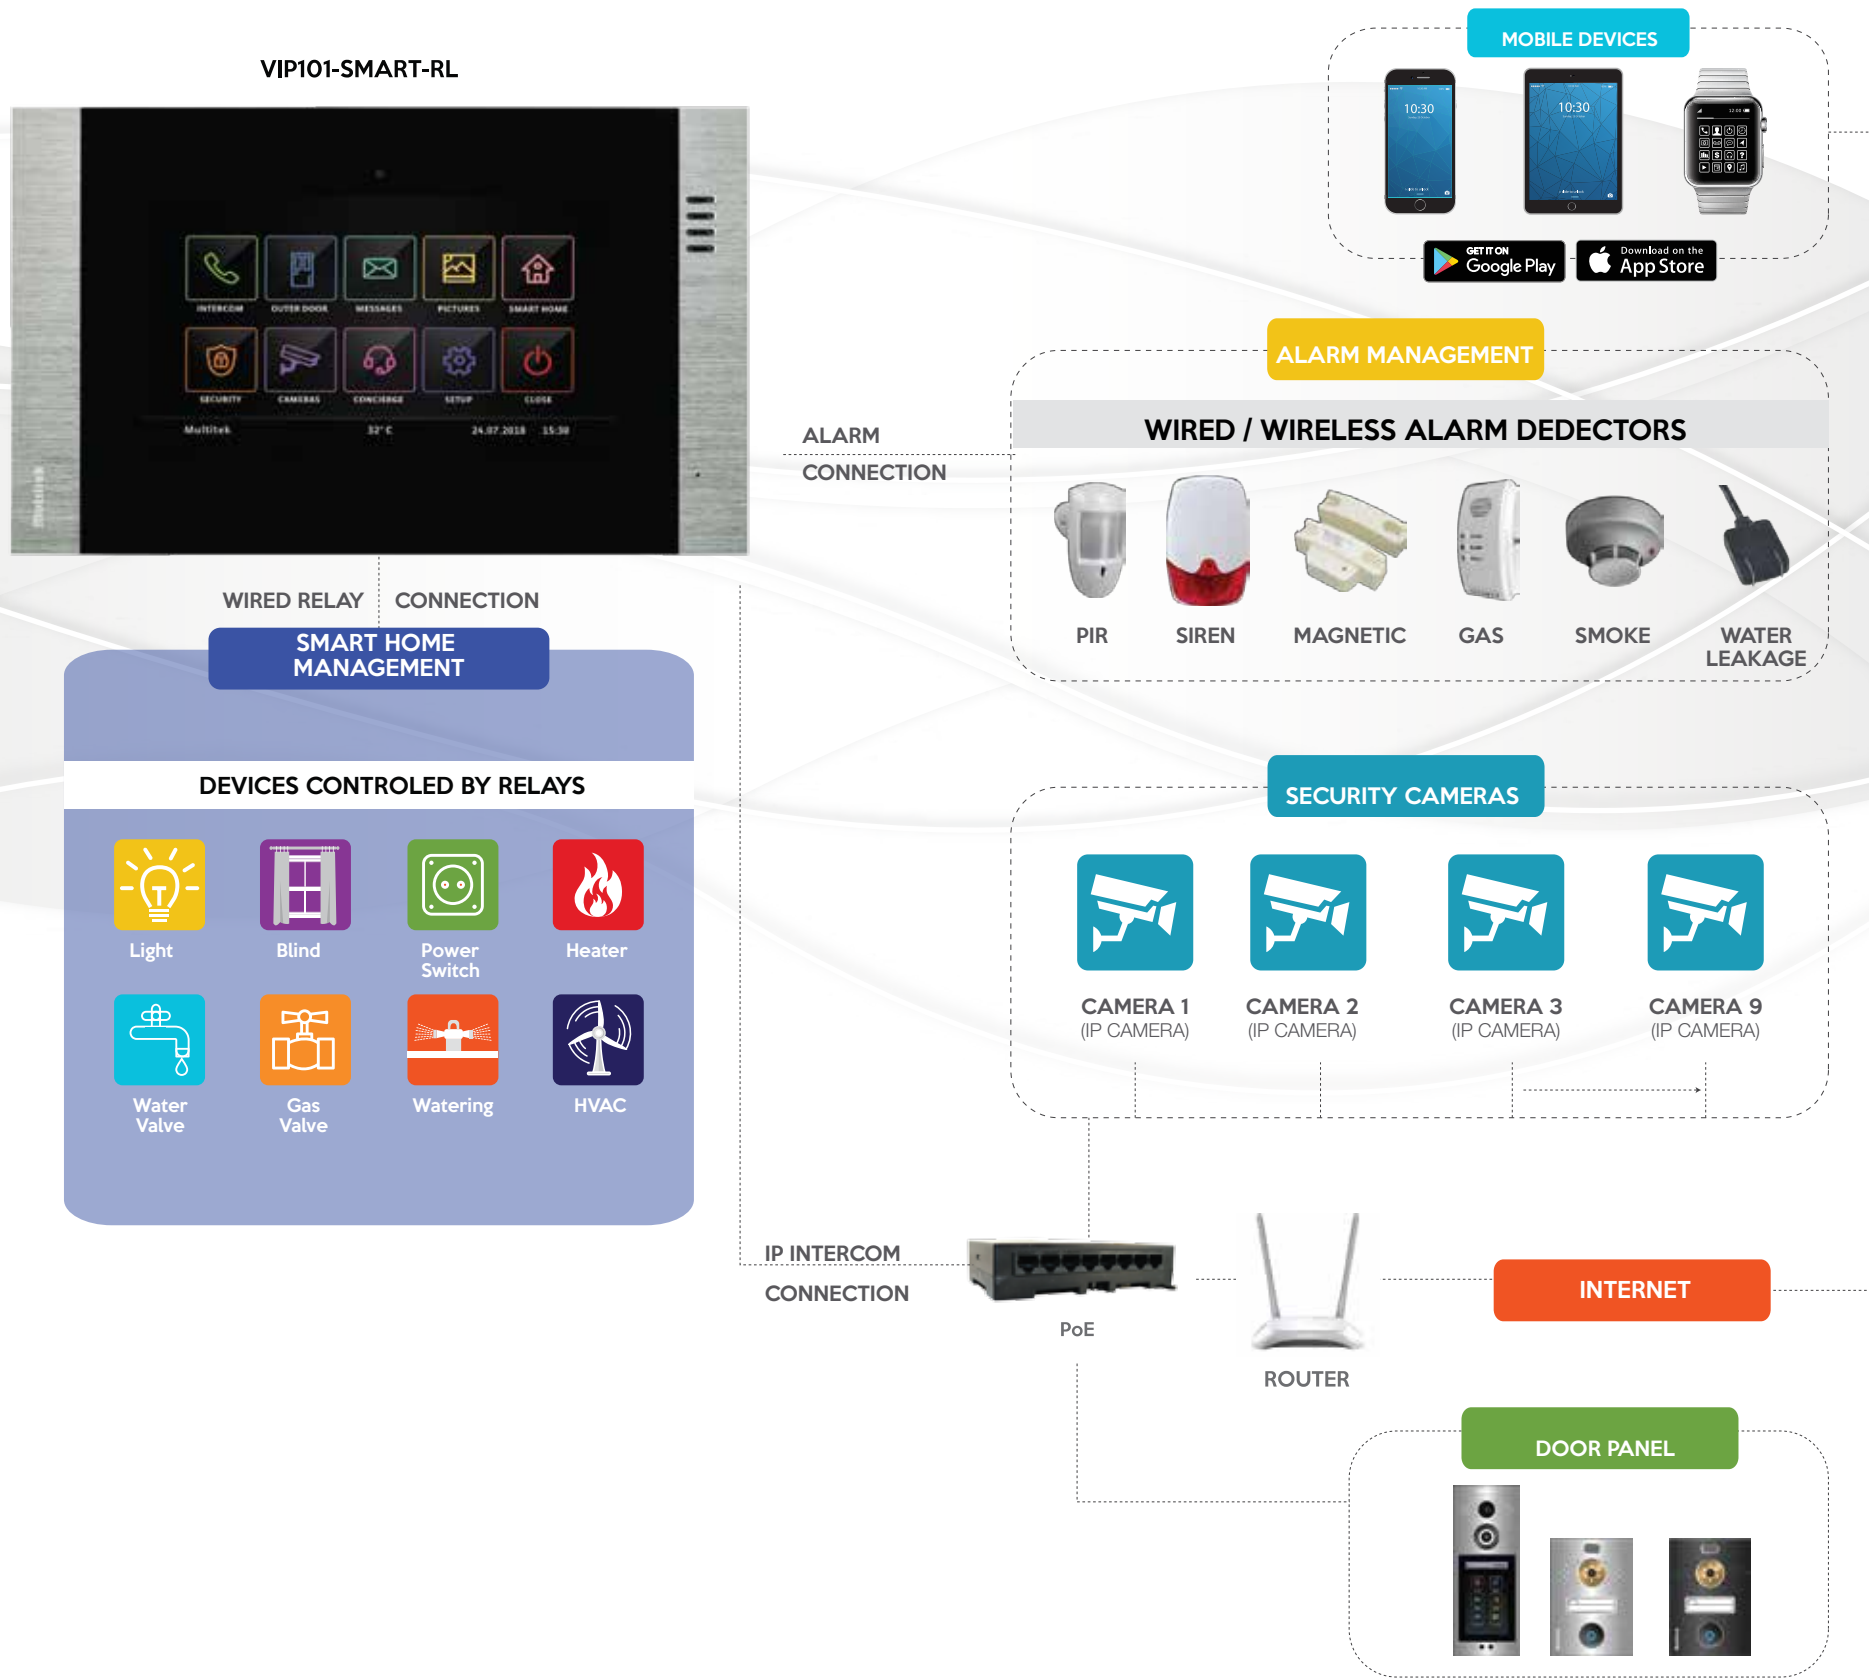

VIP101 / VIP100-DELUX-SMART-RL   16 relay control

Phase Neutral

Note: If the room monitor relay outputs will control the devices operating with 220VAC, a rail-type relay must be placed between the monitor and the device . (for security purposes, 220VAC is not allowed to circulate within the monitor) Rail-type relays are placed in the rails in the electric panel. An additional 12VCD adapter is also used to power the valves and rail-type relays.

2 - LINUX IP INTERCOM SYSTEM

LINUX IP INTERCOM SYSTEM FEATURES

Stylish and convenient solution for prudent projects

LINUX IP INTERCOM SYSTEM FEATURES

- There is no limit in number rooms, floors, doors or facilities that can be connected
- There is no additional infrastructure element (server etc.) requirement
- Crystal clear voice and video quality for all rooms
- Network ethernet (PoE) connection with CAT6 cabling
- All units can call each other with no additional fee
- Voice message from door panel to rooms
- Security, gatekeeper and door connection with a single touch

- Different ring tones according to call types
- Voice assistance (busy, keypad notes etc.)
- Screenshots of door calls (100 without SD card)
- Unique password or proximity card for each room to unlock door
- Alarm management with 4 zones and direct report to security
- Elevator module (standart monitor with special software)
- Connected surrounding IP and CCTV cameras
- External IP camera view when security calls

Gray

LIK35

3,5" TFT LCD DOOR PANEL (LINUX)

GENERAL FEATURES

Night view LEDs	Unique password or proximity card for each room to unlock door
Security, gatekeeper and door connection with a single touch	
Phonebook	Voice message can be left for unanswered calls
Unique door password for all rooms	Voice assistance (busy, keypad notes etc.)
CAT6 cabling PoE	Built-in proximity card reader

TECHNICAL FEATURES

Screen	3,5" TFT LCD (320x240)
Camera	1.3 MP CMOS, configurable angle, night view LEDs
Touch	Capacitive touch panel
Operating System	Linux
Transmission	TCP / IP, SIP protocol
Codec	Voice G.711, Video H.264 MPEG
Network Connection	Ethernet (PoE)
Working Voltage	12-24 VDC (PoE)
Working Current	Max. 500 mA
Door unlock	Password, proximity card
Working temperature	-20°C, +70°C,
Humidity	%20-95 (noncondensed)
Installation	Flush mount or surface mount with LED frame
Colour	Gray aluminum
Dimensions	318x130x51 mm

On screen display:
09:00:56   25-04-2018
